

Blaze MRI

Our Blaze MRI luminaire is specifically designed for MRI rooms. The luminaire has virtually no electromagnetic emissions and the long-life LEDs are unaffected by the strong magnetic fields created by an MRI scanner.

The Blaze MRI fits standard 600x600 ceiling grids and can be supplied with emergency back-ups in the event of power failure.

The Blaze MRI can also be supplied with decorative mood lighting using images to create a calming environment for patients.

Project based, please contact our sales team to specify.

Light source:	LED.
Illumination:	Dimmable.
Input:	220/240V, 50/60Hz.
Back-up capability:	>3 Hour emergency light levels. 6 Hour recharge time.
